DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-27 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,429,170. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims differ only in that claim 1 of US '170 specifies alumina whereas an aluminate is instantly claimed. However, it is considered that it would have been obvious to one of ordinary skill in the art at the time the invention was made to claim an aluminate in the claim of US '170 because the alumina is combined with a promoter

metal and an aluminate may be produced by the combination of metal and alumina.

Allowable Subject Matter

3. Claims 28-62 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter: A sorbent containing zinc oxide and another solid metal oxide solution having one of the formulas of the instant claims 28, 35, or 49 would not have been obvious to one of ordinary skill in the art at the time the invention was made.
